Jerusalem November 24, 2019 355/2019

The Population of Ethiopian Origin in Israel Selected Data Published on the Occasion of the Sigd Festival

- At the end of 2018, the population of Ethiopian origin in Israel was 151,800 residents.¹ Approximately 86,900 were born in Ethiopia, and 64,900 were Israeliborn with fathers born in Ethiopia.
- In 2018, 208 immigrants arrived in Israel from Ethiopia. (Of these, 56 were immigrants and 152 arrived under a different status – in most cases, under family reunification).
- More than 60% of the population of Ethiopian origin lives in two main districts: approximately 38% live in the Central District and approximately 25% live in the Southern District. At the end of 2018, the urban locality with the largest population of Ethiopian origin was Netanya (approximately 11,900 persons). However, the highest percentage of residents of Ethiopian origin out of the total population in a locality was found in Qiryat Mal'akhi (16.3%).
- The population of Ethiopian origin **marries at a later age** than the overall Jewish population.

For explanations and clarifications, please contact the Statistical Information Center at +972-2-659-2666

¹ The population of Ethiopian origin in Israel also includes Israeli-born persons whose fathers were born in Ethiopia.

- 87% of persons of Ethiopian origin marry another person of the same origin; more men (90%) than women (84%) marry other persons of Ethiopian origin.
- The **divorce rate** among the population of Ethiopian origin was higher than among the overall Jewish population (16 per 1,000 marriages, compared with 9 per 1,000 marriages in the overall Jewish population).
- Live births In 2018, 3,913 babies were born to women of Ethiopian origin in Israel. That year, the average number of children that a woman of Ethiopian origin was expected to bear during her lifetime was 2.95.
- The percentage of single-parent families in the population of Ethiopian origin was higher than in the Jewish population approximately 26%. This was twice the percentage of single-parent families among the overall population of Jews and Others in Israel (approximately 13%).
- During the 2017/18 academic year, 32,137 pupils of Ethiopian origin 2.4% of the total population of pupils in the Hebrew education system – were enrolled in primary and secondary schools.
- The percentage of twelfth-grade pupils of Ethiopian origin taking **matriculation exams** was 92.4% in 2018, compared with 95% of the pupils in the Hebrew education system overall.
- The number of **students** of Ethiopian origin in institutions of higher education² has been increasing in recent years: from 2,372 in 2011/12 to 3,417 in 2018/19.

² This does not include the Open University, which has unique characteristics that set it apart from the other institutions of higher education in Israel. This has to do with factors such as the nature of the admissions process and the courses of study, as well as the makeup of the student population. Therefore, the data in this media release do not include the statistics from the Open University. However, it is hoped that data from the Open University will be included in the ongoing statistics of institutions of higher education, with reference to the Open University's unique status.

- In 2018, approximately 33,000 immigrants of Ethiopian origin were registered at the Ministry of Labor, Welfare and Social Services – a rate of approximately 376 per 1,000 persons. By way of comparison, approximately 180 per 1,000 persons in the Jewish and Others population born abroad were registered at the ministry.
- The percentage of **persons of Ethiopian origin who were judged** was 6.6% of the total number of Jewish and Other residents of Israel who were judged. The percentage of persons of Ethiopian origin among the minors (14.3%) was much higher than the percentage of adults (6.0%).
- There were 1,781 active athletes³ of Ethiopian origin⁴ in 2017/18 similar to their number in 2016/17 (1,775). The active athletes of Ethiopian origin make up approximately 1.9% of the total number of active athletes.
- Net money income per household among persons of Ethiopian origin⁵ was NIS 13,306, compared with NIS 16,518 among households in the overall population, whereas money expenditure⁶ was NIS 10,549, compared to NIS 13,114 in the overall population.

³ There are two criteria for defining active athletes: participation in a minimum number of competitions, and an upper cutoff of the year of birth (the number of competitions and the cutoff year depend on the specific sport).

⁴ Jews and Others aged 7 to 80 who were born in Ethiopia, or whose fathers were born in Ethiopia.

⁵ A household in which the head of the household or one of the parents was born in Ethiopia.

⁶ Money expenditure: Consumption expenditure excluding the imputation for housing services.

The Population of Ethiopian Origin in Israel: On the Occasion of the Sigd Festival 24/11/2019

Population

At the end of 2018, the **population of Ethiopian origin in Israel numbered 151,800 residents**. Approximately 86,900 (57%) were born in Ethiopia, and 64,900 (approximately 43%) were persons born in Israel whose fathers were born in Ethiopia.⁷

Immigration from Ethiopia

Approximately two-thirds of the immigrants from Ethiopia arrived in two major waves: the first in the 1980s (Operation Moses) and the second in the 1990s (Operation Solomon). Immigration from Ethiopia has declined in recent years.

In 2018, 208 immigrants arrived in Israel from Ethiopia. Of them, 56 arrived under immigrant status⁸ and 152 arrived under a different status, in most cases family reunification (as part of the implementation of the government resolution regarding the members of the Falashmura). As per the resolution, 1,430 members of the Falashmura⁹ arrived in Israel in 2017, and 174 members arrived in 2016.

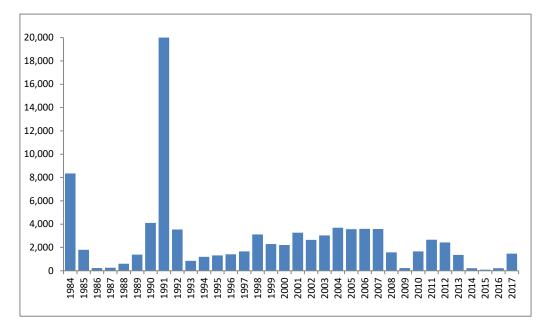

Diagram 1 – Immigrants from Ethiopia, 1984–2017 (Absolute Numbers)

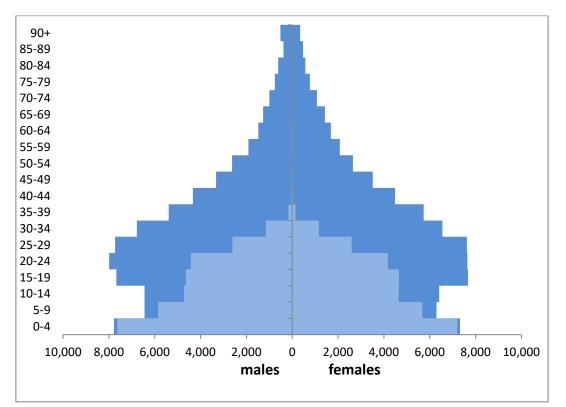

- ⁸ Including new immigrants and immigrant citizens.
- ⁹ Government Resolution No. 1911 (August 11, 2016), Entry into Israel of Members of the Communities of Gondar and Addis Ababa for the Purpose of Family Reunification.

⁷ In addition, at the end of 2018 there were 4,280 Jews and Others who were born in Israel whose mothers were born in Ethiopia and whose fathers were not.

Age Composition

At the end of 2018, the proportion of children of Ethiopian origin aged 0 to 14 was 27.1% of that population (of whom approximately 90.0% were born in Israel). The percentage of persons aged 65 and older among the population of Ethiopian origin was 6.3% (most of them born abroad).

By way of comparison, the proportion of persons aged 0 to 14 among the overall Jewish and Others population that year was identical to that of the population of Ethiopian origin: 27.1%. The proportion of persons aged 65 and over among the Jewish and Other population was 13.6%, more than twice their proportion of the population of persons of Ethiopian origin.

[The words "Males" and "Females" in the diagram should be capitalized.]

[Missing text in the diagram:]

Population of Ethiopian origin

Of them: Persons born in Israel

The Population of Ethiopian Origin in Israel: On the Occasion of the Sigd Festival 24/11/2019

Geographic Distribution

Of the population of Ethiopian origin, 45% live in the centre of the country: 58,000 persons (38.4%) live in the Central District and approximately 10,000 persons (6.8%) live in the Tel Aviv District. Approximately one-quarter of the population (37,500 persons) lives in the Southern District.

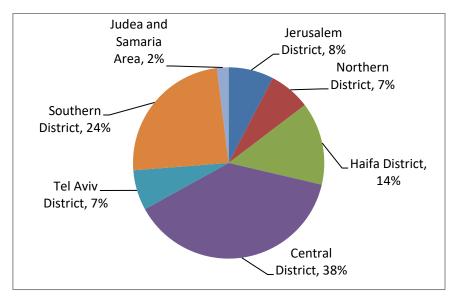

Diagram 3 – The Population of Ethiopian Origin by District, 2018, Percentages

[Diagram text – follows the Hebrew, not the English above]

Judea and Samaria Area: 2%

Tel Aviv District: 7%

Northern District: 7%

Jerusalem District: 7%

Haifa District: 14%

Southern District: 25%

Central District: 38%

At the end of 2018, the urban locality with the highest **number** of residents of Ethiopian origin was Netanya (11,900 persons). The locality with the highest **percentage** of residents of Ethiopian origin, of the locality's overall population, was Qiryat Mal'akhi (16.3%). In comparison, less than 2% of the total population of Israel was of Ethiopian origin.

Table A – The Population of Ethiopian Origin at the End of 2018, in Main Localities

(1)

Locality	Total population in locality (thousands)	Total Population of Ethiopian origin in locality (thousands)	% population of Ethiopian origin out of total population in locality
National Total	8,967.6	151.8	1.7
Netanya	217.2	11.9	5.5
Rishon LeZiyyon	251.7	8.8	3.5
Be'er Sheva	209.0	8.4	4.0
Petah Tiqwa	244.3	7.8	3.2
Rehovot	141.6	7.5	5.3
Ashqelon	141.0	7.5	5.3
Ashdod	224.6	7.3	3.3
Jerusalem	919.4	6.3	0.7
Hadera	95.7	5.9	6.1
Haifa	283.6	5.8	2.0
Qiryat Gat	55.0	5.3	9.7
Bet Shemesh	118.7	4.2	3.6
Ramle	75.7	4.2	5.6
Lod	75.7	4.1	5.4
Qiryat Mal'akhi	23.1	3.8	16.3
Afula	51.7	3.7	7.2
Yavne	46.7	3.3	7.1
Tel Aviv-Yafo	451.5	2.8	0.6
Bat Yam	128.8	2.6	2.0
Holon	194.3	2.3	1.2

(1) Localities with 2,000 or more residents of Ethiopian origin

In some of the localities, the communities consisting of residents of Ethiopian origin are concentrated in specific neighbourhoods. Thus, for example, approximately 3,000 persons of Ethiopian origin reside in the Qiryat Moshe (North) neighbourhood of the city of Rehovot, comprising more than 56% of the neighbourhood's total number of residents. In the Ramat Eliyahu (North) neighbourhood of Rishon LeZiyyon, there are 2,800 residents of Ethiopian origin, comprising 52% of the neighbourhood's total number of residents.

Name of locality and neighbourhood	Total population of neighbourhood (thousands)	Total population of Ethiopian origin in neighbourhood (thousands)	Percentage population of Ethiopian origin out of total neighbourhood population
Rehovot Qiryat Moshe (North)	5.4	3.0	.567
Qiryat Gat P. Z.	0.5	0.3	55.8
Rishon LeZiyyon Ramat Eliyahu (North)	5.3	2.8	.522
Bet Shemesh Qiryat Ben Eli'ezer; Ganei Shemesh	1.0	0.4	41.1
Netanya Ne'ot Shaked (Azorim) East	5.0	1.9	38.2
Qiryat Mal'akhi Herzl; Weizmann; Newe Or	5.1	1.9	37.1

Table B – Neighbourhoods With One-Third or More Residents of Ethiopian Origin, End of 2018 (1)

(1) Localities with 2,000 or more residents of Ethiopian origin

Marriages and Divorces

During 2017, 921 grooms and 981 brides of Ethiopian origin were married in Israel, 91% for the first time.

Absolute numbers	Grooms	Brides
Total number of persons of Ethiopian origin marrying	921	981
Born in Ethiopia – total	744	719
Thereof: Immigrated through 1990	149	122
Immigrated after 1990	595	597
Israeli-born, father born in Ethiopia	177	262

Table C – Marriages of Ethiopians in 2017

Of persons of Ethiopian origin who married, 87% married a spouse of the same origin. The percentage of men who married a spouse of the same origin (90%) was higher than the number of women who did so (84%). Members of the population of Ethiopian origin tended to marry at a later age than members of the general Jewish population did. Among men of Ethiopian origin, the median age¹⁰ at first marriage was 29.6 in 2017 (2.2 years older than the median age of Jewish grooms). Among women of Ethiopian origin, the median age at first marriage was 26.8 (1.3 years older than Jewish brides).

In 2017, 336 men and 352 women of Ethiopian origin divorced.

The divorce rate among the population of Ethiopian origin was higher than the divorce rate in the overall Jewish population. Approximately 16 of every 1,000 married couples divorced, compared with 9 of every 1,000 married couples in the overall Jewish population.

Live Births

In 2018, 3,913 infants were born to women of Ethiopian origin. Approximately 83% of these women were born in Ethiopia.

¹⁰ Median age: The age at which half the persons marrying are younger and half are older.

The Population of Ethiopian Origin in Israel: On the Occasion of the Sigd Festival 24/11/2019

That year, the average number of children an Ethiopian woman was expected to bear during her lifetime was 2.95. This figure was 3.05 in the Jews and Others population.

In 2018, the age at first birth among women of Ethiopian origin was 27.8 years on average, compared to 28.6 years on average among Jewish and Other women. It was found that approximately 14% of the mothers of Ethiopian origin were single, which may explain their young age, on average, at their first birth.

Ethiopian Households¹¹

Households¹²

The average number of households consisting of persons of Ethiopian origin in Israel in 2016–2018 was 36,700, accounting for approximately 1.4% of all Israeli households and approximately 1.7% of the households of Jews and Others, similar to previous years.

As in the overall Jewish population, approximately 84% of the households of Ethiopian origin were family households¹³. Of those, approximately 77% consisted of only one family. However, the relative proportion of households of one family with others or two or more families was slightly higher in households of Ethiopian origin than it was among Jewish and other households (about 6% and 4%, respectively).

The average size of households of Ethiopian origin was 3.85 persons – larger than the size of households in the overall population (3.28), as well as households of Jews and Others (3.07).

¹¹ The source of data is the Labour Force Survey. The data for the overall population and the population of Jews and Others are for 2018. The data for the population of Ethiopian origin are the average for 2016–2018. The population does not include persons living in institutions, kibbutzim, student dormitories, and those living outside of localities (Bedouin in the South).

¹² A household is defined as one person or a group of persons living together in one dwelling on a permanent basis most of the week, who have a joint expense budget for food. A household can include persons who are not related to each other.

A household of persons of Ethiopian origin was defined as a household in which at least one person aged 15 or over is of Ethiopian origin (i.e., Ethiopian-born or whose father was born in Ethiopia).

¹³ A family household is a household that contains at least one family. A family household can include: one family, one family with other persons, or two families or more.

The Population of Ethiopian Origin in Israel: On the Occasion of the Sigd Festival

Families¹⁴

In Israel, there are approximately 31,300 families of Ethiopian origin. More than half have a traditional structure, consisting of a couple with children of all ages (approximately 61%). This percentage is similar to that of families of Jews and Others (58%).

The percentage of couples without children among families of Ethiopian origin was the lowest (approximately 11%): lower than the percentage of couples without children in the country overall (approximately 25%) and lower than the percentage among families of Jews and Others (approximately 28%), similar to previous years. It should be noted that the couples of Ethiopian origin without children are relatively young, so they may not have had children yet. This is in comparison to couples without children in the overall population, which includes older couples whose children have left home.

The percentage of single-parent families in the population of Ethiopian origin was especially high (approximately 26%) – more than twice as high as the percentage of single-parent families in the country overall and among families of Jews and Others (approximately 13%).

Pupils in the Educational System

In the 2017/18 school year, 32,137 pupils of Ethiopian origin¹⁵ were enrolled in primary and secondary education; they constituted 2.4% of all pupils in the Hebrew education sector.

In the 2017/18 school year, 27.2% of the pupils of Ethiopian origin were born in Ethiopia, compared to 44.8% in the 2007/08 school year (Diagram 4).

¹⁴ A family (nuclear family) is defined as two or more persons who share the same household and are related to one another as husband and wife, as parent and child, as an unmarried couple, as grandparents with grandchildren (without the child's parents), or siblings who live together (without their own spouses or children). A family of Ethiopian origin was defined as a family in which at least one of the persons aged 15 or over is of Ethiopian origin (i.e., Ethiopian-born or whose father was born in Ethiopia).

¹⁵ Ethiopian origin – a person born in Ethiopia, or a person born in Israel whose father was born in Ethiopia.

Children born in Ethiopia

In the 2017/18 school year, about 44% of the pupils of Ethiopian origin were enrolled in schools under state-religious supervision (primary and secondary education). This percentage has been declining over the past decade (it was 56.7% in the 2007/08 school year). Concomitantly, there has been an increase in the percentage of students enrolled in schools under State supervision (51.5% compared to 41.3% in the 2007/08 school year). In Ultra-Orthodox supervision, this figure rose to 4.5% – more than twice that of the 2007/08 school year (2.0%) (Diagram 5).

Ultra-Orthodox

In the primary education system in 2017/18, 5.8% of Ethiopian-born pupils and 8.6% of Israeli-born pupils whose fathers were born in Ethiopia studied under ultra-Orthodox supervision. Over the past decade, there has been a decline in the proportion of students under state-religious supervision in both groups of students (pupils born in Ethiopia and those born in Israel whose fathers were born in Ethiopia), concomitant with an increase in the proportion of pupils under state supervision and ultra-Orthodox supervision (Diagram 6).

Among pupils of Ethiopian origin in upper secondary education, 49.1% (55.7% of the boys and 42.6% of the girls) were enrolled in the technological/vocational track, ¹⁶ whereas 34.7% of their non-Ethiopian counterparts in Hebrew education (32.7% of the boys and 36.9% of the girls) were enrolled in the technological/vocational track.

¹⁶ The method for calculating technological/vocational education (known in the past as the technology track) was changed beginning in 2016/17 and updated to reflect the current definitions of the Ministry of Education.

The Population of Ethiopian Origin in Israel: On the Occasion of the Sigd Festival 24/11/2019

Matriculation Examinees¹⁷

In the 2017/18 school year, approximately 2,823 twelfth-grade pupils of Ethiopian origin (Ethiopian-born or Israeli-born with father born in Ethiopia) took matriculation exams.

The percentage of twelfth-grade pupils of Ethiopian origin taking matriculation exams was 92.4% in 2018, compared with 95% of the examinees in the overall Hebrew education system. The percentage of those entitled to a matriculation certificate was lower – 66.2% versus 80.2%, respectively. However, this percentage has been rising in recent years, with a substantial increase over the past year (see Diagram 7). The share of pupils of Ethiopian origin holding a matriculation certificate who met university entrance requirements – i.e., the percentage of potential candidates for continuing studies at institutions of higher education – was 43% of all pupils of Ethiopian origin, compared with two-thirds (70.6%) of the overall number of students in the Hebrew education system.

The percentage of those entitled to a matriculation certificate among pupils of Ethiopian origin who studied in institutions with state-religious supervision was 72.7%, compared with 60.9% among those who studied in institutions with general supervision. Regarding the percentage of those who met university entrance requirements, the situation was reversed – 49% of those under general supervision met the requirements, compared with 38% of those under State-religious supervision.

In 2018, the share of the second-generation pupils of Ethiopian origin (those born in Israel whose fathers were born in Ethiopia) was 55.4% of all 12th-grade students of Ethiopian origin. The percentages of 12th-grade pupils of Ethiopian origin who were entitled to a matriculation certificate were 71.1% of those born in Ethiopia and 66.7% among second-generation pupils of Ethiopian origin. However, the percentage of those who met university entrance requirements was higher among the second generation – 45.6% – compared with 39.8% among those who had been born in Ethiopia.

¹⁷ In order to allow for a valid comparison between pupils of Ethiopian origin and all pupils in Hebrew education, the population of pupils examined in this section excludes those enrolled in schools under ultra-Orthodox supervision (pupils of Ethiopian origin as well as those enrolled in Hebrew education in general).

Higher Education

Students

The number of students of Ethiopian origin studying at institutions of higher education¹⁸ has been increasing in recent years: from 2,372 in 2011/12 to 3,417 in 2018/19. The percentage of students of Ethiopian origin of the overall number of students also increased during those years – from 0.9% to 1.3%. Despite what was stated above, the relative chances of Ethiopian immigrants entering higher education are still 0.7 times lower than those of native-born Israelis. The chances of men of Ethiopian origin to enter higher education are particularly low, at half the chances of native-born Israeli men.

2002

2003

2004

¹⁸ Not including the Open University. The Open University has characteristics that distinguish it from the other institutions of higher education. This is reflected in the students' acceptance processes and their studies, the composition of the student population, and more. Therefore, the data in this press release do not include the data of the Open University. However, the aim is to integrate the data of the Open University into the current statistics of institutions of higher education, while taking its uniqueness into account.

2006
2007
2008
2009
Number of students of Ethiopian origin
Percentage of the total number of students

First Degree Studies

In 2018/19, 2,989 students of Ethiopian origin (1.5% of all students) studied toward a first degree. High percentages of students of Ethiopian origin studied the following fields: business and administration sciences (2.9%), paramedical studies (2.3%), and social sciences (2.0%). Low percentages studied the following fields: agriculture (0.47%), medicine (0.5%), and natural sciences and mathematics (0.44%). In that year, students of Ethiopian origin attended mainly the academic colleges (57.8% compared with 47.5% of all students), fewer attended the universities (28.3% versus 38.2% of all students), and 14.0% attended the academic colleges of education (compared with 14.4% of the overall number of students).

Second and Third Degree Studies

In 2018/19, 391 students of Ethiopian origin studied toward a second degree, and 24 studied toward a third degree. The percentages of students of Ethiopian origin were low among second degree students (0.6%) and third degree students (0.2%). The main fields studied by students of Ethiopian origin in the second degree programs were business and administration sciences (29.2%), social sciences (23.5%), and education (20.5%).

Persons Registered at Departments of Social Services and Defined at the Ministry of Labour, Welfare, and Social Services as Needing Intervention

Approximately 33,000 immigrants of Ethiopian origin (a rate of about 376 per 1,000 persons) were registered at the Ministry of Labour, Welfare, and Social Services in 2018. By way of comparison, the percentage of Jews and Others who were registered was approximately 180 per 1,000 persons. Of the immigrants of Ethiopian origin, approximately 80% (about 26,000 persons, at a rate of about 309 per 1,000 persons) were defined as needing intervention.¹⁹

Approximately 20,000 children born in Israel whose fathers immigrated from Ethiopia (the second generation of immigrants of Ethiopian origin) were registered, at a rate of about 309 per 1,000 persons – three times that of native-born Israelis (about 98 per 1,000 persons). Approximately only 40% of those registered – 8,000 persons, at a rate of about 123 per 1,000 persons – were defined as needing intervention.

The most often cited reason for needing intervention among immigrants from Ethiopia, and among the second generation of immigrants of Ethiopian origin who were defined as needing intervention, was dysfunctional parents and/or children/adolescents (approximately 43%). The second most prevalent reason for needing intervention was poverty, income and employment problems (approximately 27%). The least prevalent reason for needing intervention was addiction and delinquency (approximately 1.9%).

Persons Placed in Settings of the Ministry of Labour, Welfare, and Social Services

In 2018, approximately 5,000 immigrants of Ethiopian origin (about 57 per 1,000 persons), and approximately 5,500 members of the second generation of immigrants of Ethiopian origin (about 85 per 1,000 persons) were placed in settings of the Ministry of Labour, Welfare, and Social Services.

Among immigrants of Ethiopian origin:

- The rate of persons placed in settings outside the home was about 5 per 1,000 persons.
- The rate of persons placed in settings in the community was about 49 per 1,000 persons.
- The rate of persons placed in settings outside the home and also in settings in the community was about 2 per 1,000 persons.

¹⁹ Need for intervention: The reason an individual applies or is referred to a department of social services. The social worker treating the family lists, for each individual in the treatment file, his or her primary need for intervention and the family's primary need for intervention, from a list of 58 needs (including "no need for intervention"). The social worker can also list a secondary need for intervention for an individual or his or her family.

Among the second generation of immigrants of Ethiopian origin whose fathers were born in Ethiopia:

- The rate of persons placed in settings outside the home was about 9 per 1,000 persons
- The rate of persons placed in community settings was about 79 per 1,000 persons
- The rate of persons placed in settings outside the home and also in community settings was about 2 per 1,000 persons.

Persons of Ethiopian Origin Judged in Criminal Trials²⁰

In 2017, 1,288 Jewish and Other residents of Israel of Ethiopian origin (of whom 804 were born in Ethiopia and 484 were born in Israel and their fathers were born in Ethiopia) were judged in criminal trials.

The percentage of persons of Ethiopian origin who were judged constituted 6.6% of the total number of residents of Israel in the Jewish and Other population who were judged. The percentage of minor immigrants of Ethiopian origin (14.3%) was much higher than that of adults (6.0%).

Males comprised 94.5% of the adults of Ethiopian origin who were judged. This percentage was higher than the percentage of males among the total number of adult residents of Israel in the Jewish and Other group who were judged: 87.4%.

Among minors of Ethiopian origin who were judged, the percentage of males was 96.5%. By way of comparison, the percentage of males among the total number of minor residents of Israel in the Jewish and Others group who were judged was 93.6%.

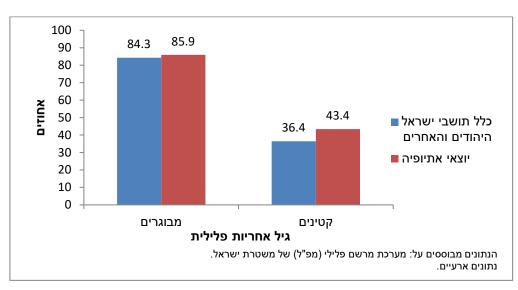

The percentage of persons convicted among adults of Ethiopian origin who were judged in criminal trials was 85.9%, slightly higher than the percentage of persons convicted among the overall population of residents of Israel in the Jewish and Others group who were judged (84.3%). By way of comparison, the percentage of convictions among minors of

²⁰ The statistics are based upon the Israel Police's Criminal Register, and are up to date as of May 2019. The data for the year of verdict 2017 are preliminary. The statistics regarding persons of Ethiopian origin refer to residents of Israel in the Jews and Others group, persons born in Ethiopia, or persons born in Israel whose fathers were born in Ethiopia.

The Population of Ethiopian Origin in Israel: On the Occasion of the Sigd Festival

Ethiopian origin who were judged (43.4%) was much higher than the percentage of convictions among the overall population of minor residents of Israel in the Jewish and Others population who were judged (36.4%).

Minors

Adults

Age of Criminal Responsibility

These preliminary data are based upon the Criminal Register of the Israel Police.

Among adults of Ethiopian origin who were judged, close to half (44.3%) were charged with offences against the public order, 23.9% were charged with offences involving bodily harm, and 18.8% were charged with property offences.

The most prevalent offences with which minors of Ethiopian origin who were judged were charged were property offences (38.4%), offences involving bodily harm (31.3%), and offences against the public order (22.2%).

An expanded media release on this topic was published on December 17, 2019.

Active Athletes²¹

In 2017/18, there were 1,781 active²² athletes of Ethiopian origin – a number similar to that of 2016/17 (1,775). The athletes of Ethiopian origin²³ comprised about 1.9% of the overall population of active athletes. This is similar to the percentage of active athletes of Ethiopian origin in the same age group²⁴ in 2017/18 (2.2%).

Women comprised 9.0% of active athletes of Ethiopian origin. This was a lower percentage than the previous year -11% – but still less than the percentage of women among the active athletes in the overall population -23.2%.

An examination by age shows that 62.2% of the active athletes of Ethiopian origin range from 12 to 17 years of age, while 28.2% are 18 to 24 years of age. The percentage of active athletes in the remaining age groups is lower than 10%.

²¹ The numbers include athletes in individual sports and in team sports.

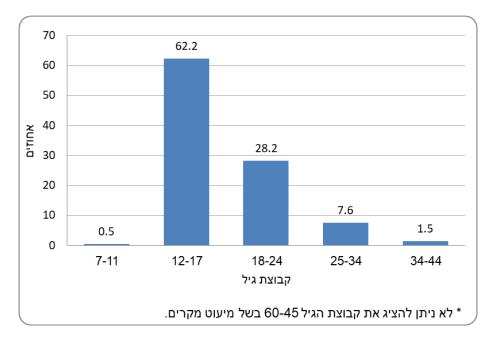

²² Two criteria determine whether an athlete is active: Participating in a minimum number of competitions and an upper threshold of birth year (both of these are determined for each sport).

²³ Jews and Others who were born in Ethiopia, or whose fathers were born in Ethiopia.

²⁴ Jews and Others aged 7 to 80.
